

## **PROGRAMMATIC PRIORITIZATION IN THE PASB**

98. The Bureau conducted two prioritization exercises during the elaboration of this Plan, in order to determine the ranking of the Strategic Objectives. The findings from the first exercise (limited to PASB headquarters) were used to inform the budget allocations in the draft Strategic Plan presented to the Executive Committee. The results of the second exercise, where all the managers of the Organizations were invited to participate, have been used in establishing the budget priorities in this final version of the Plan. Although a similar methodology was applied to both exercises, the specific criteria and results described below apply to the second exercise.

### *Methodology*

99. The prioritization exercise was designed to obtain a ranking of the Strategic Objectives by a variety of PASB managers, per agreed-upon criteria, using a modified Delphi methodology.

100. First, a draft set of criteria were developed (based on those used in the first exercise, plus input received after that exercise), with weighting to reflect the relative importance of the criteria. These were vetted among all PASB managers, including country representatives, center directors, headquarters Area Managers and Executive Management. There was a high level of participation, and changes to the criteria and their weighting were made based on the feedback received.

101. Second, each Strategic Objective was rated on a scale of 1 to 5 (5 being the highest priority) for each of the agreed-upon criteria. All managers were given the opportunity to rate the SOs via email. Their responses were collated and analyzed, providing a ranking of the SOs.

### *Criteria*

102. The following were the criteria used in the exercise, reflecting inputs received from throughout the Bureau. The weights given in parentheses reflect the relative importance of each criterion.

- a. Supports the Health Agenda for the Americas and other regional mandates (x4)
- b. Addresses the burden of disease in the Region (x2)
- c. Supports vulnerable population groups or key countries, promoting equity (x3)
- d. Contributes to global health security (x2)
- e. Supports achievement of the health-related MDGs (x2)
- f. PAHO technical cooperation is a cost-effective means to improve health outcomes (x2)
- g. Supports universal access to health related goods and services (x2)
- h. Countries have low access to non-PAHO resources and difficulty in replacing PAHO technical cooperation (x1)
- i. Has potential for successful cross-cutting collaboration: inter-programmatic, inter-country, inter-sectoral, inter-regional or inter-agency (x1)
- j. Difficult to access voluntary contributions (x1) (additional criterion, used only for assignment of regular budget amounts with respect to the total budget)

### *Results*

103. The results of the second exercise were analyzed along with those from the first (more limited) exercise, considering comments made by Member Countries in the Directing Bodies. The resultant ranking of the Strategic Objectives follows, with the first SO listed being the highest priority for the Bureau.

<b>Ranking</b>	<b>SO#</b>	Strategic Objective text
<b>1</b>	<b>SO4</b>	To reduce morbidity and mortality and improve health during key stages of life, including pregnancy, childbirth, the neonatal period, childhood and adolescence, and improve sexual and reproductive health and promote active and healthy aging for all individuals
<b>2</b>	<b>SO1</b>	To reduce the health, social and economic burden of communicable diseases
<b>3</b>	<b>SO2</b>	To combat HIV/AIDS, tuberculosis and malaria
<b>4</b>	<b>SO3</b>	To prevent and reduce disease, disability and premature death from chronic noncommunicable conditions, mental disorders, violence and injuries
<b>5</b>	<b>SO7</b>	To address the underlying social and economic determinants of health through policies and programs that enhance health equity and integrate pro-poor, gender-responsive, and human rights-based approaches
<b>6</b>	<b>SO13</b>	To ensure an available, competent, responsive and productive health workforce to improve health outcomes
<b>7</b>	<b>SO10</b>	To improve the organization, management and delivery of health services
<b>8</b>	<b>SO12</b>	To ensure improved access, quality and use of medical products and technologies
<b>9</b>	<b>SO6</b>	To promote health and development, and prevent or reduce risk factors such as use of tobacco, alcohol, drugs and other psychoactive substances, unhealthy diets, physical inactivity and unsafe sex, which affect health conditions
<b>10</b>	<b>SO14</b>	To extend social protection through fair, adequate and sustainable financing
<b>11</b>	<b>SO11</b>	To strengthen leadership, governance and the evidence base of health systems
<b>12</b>	<b>SO8</b>	To promote a healthier environment, intensify primary prevention and influence public policies in all sectors so as to address the root causes of environmental threats to health
<b>13</b>	<b>SO5</b>	To reduce the health consequences of emergencies, disasters, crises and conflicts, and minimize their social and economic impact
<b>14</b>	<b>SO9</b>	To improve nutrition, food safety and food security throughout the life-course, and in support of public health and sustainable development

104. This ranking has been used to inform budgetary priorities for the 2008-2009 biennium, and will be used for subsequent biennia, with possible changes based on changes in external or external circumstances.
