ORGANISATION MONDIALE DE LA SANTE

124^e SESSION DU COMITE EXECUTIF

Washington, D.C., 21-25 juin 1999

Point 5.4 de l'ordre du jour provisoire

CE124/12, Add. I (Fr.)
17 juin 1999
ORIGINAL : ANGLAIS

LE SYNDROME D'IMMUNODEFICIENCE ACQUISE (SIDA) DANS LES AMERIQUES

Le Directeur se félicite de soumettre à l'agrément du Conseil directeur le rapport actualisé de situation portant sur les activités de surveillance épidémiologique du SIDA dans les Amériques au juin 1999.

Le document est disponible en version anglaise ou espagnole uniquement du « Regional Program on AIDS and STD, Division of Disease Prevention and Control », OPS.

AIDS Surveillance in the Americas

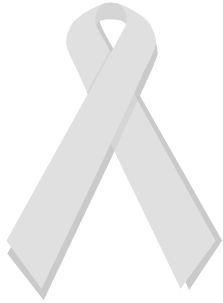

Biannual report
June 1999

Regional Program on AIDS and STD
Division of Disease Prevention and Control
Pan American Health Organization
World Health Organization
WHO/PAHO/UNAIDS Working Group on
Global HIV/AIDS and STD Surveillance

TABLE OF CONTENTS

- AIDS cases as of June of 1999
 - Global estimates of the HIV/AIDS epidemic as of end 1998
 - Regional Program on AIDS and STD
 - AIDS Surveillance in the Americas
 - Table 1. Number of reported cases of AIDS by year, and cumulative cases and deaths, by country and subregion, as of 30 May 1999
 - Table 2. Annual incidence rates of AIDS (per million population), by country and by year, 1991-1998, as of 30 May 1999
 - Table 3. Annual incidence rates of AIDS (per million population), by sex, by country and by year, 1991-1998, as of 30 May 1999.
 - Table 4. Male:Female ratio of reported AIDS cases, by country and by year, 1991-1998, as of 30 May 1999.
 - Table 5. Total cases, pediatric cases, percent of pediatric cases from total; perinatal cases, and percent of perinatal cases from total pediatric, by subregion and country, cumulative to 30 May 1999.
 - Cumulative total, percent distribution and trend of the number of AIDS cases in the Andean Area
 - Cumulative total, percent distribution and trend of the number of AIDS cases in Brazil
 - Cumulative total, percent distribution and trend of the number of AIDS cases in the Caribbean
 - Cumulative total, percent distribution and trend of the number of AIDS cases in Central America
 - Cumulative total, percent distribution and trend of the number of AIDS cases in the Latin Caribbean
 - Cumulative total, percent distribution and trend of the number of AIDS cases in Mexico
 - Cumulative total, percent distribution and trend of the number of AIDS cases in North America
 - Cumulative total, percent distribution and trend of the number of AIDS cases in the Southern Cone
 - Annual incidence of AIDS cases by Subregion
-

AIDS Cases

June 1999

Worldwide cases (November 1998): 1,987,217

Cases in the Americas: 932,693

Adults: 915,092

Children: 17,601

Number of Deaths: 513,365

Global estimates of the HIV/AIDS epidemic as of end 1998

People newly infected with HIV in 1998	Total Adults Women Children <15 years	5,8 million 5,2 million 2,1 million 590 000
Number of people living with HIV/AIDS	Total Adults Women Children <15 years	33,4 million 32,2 million 13,8 million 1,2 million
AIDS deaths in 1998	Total Adults Women Children <15 years	2,5 million 2,0 million 900 000 510 000
Total number of AIDS deaths since the beginning of the epidemic	Total Adults Women Children <15 years	13,9 million 10,7 million 4,7 million 3,2 million
Total number of AIDS orphans since the beginning of the epidemic (defined as children who lost their mother or parents to AIDS when they were under the age of 15)	Total	8,2 million

■ AIDS Surveillance in the Americas

PAHO began its AIDS surveillance system in 1986, although cases had been reported informally to PAHO since 1983. The information is currently submitted to PAHO from 47 countries and territories of the Region of the Americas. These data are received within 30 to 45 days after the end of each quarter. PAHO then produces the present report, which is distributed to all the countries in the Region. Twice a year PAHO sends the information to the World Health Organization headquarters in Geneva, Switzerland, where data are gathered from all regions, and published as the Global AIDS Report.

As of June of 1999, a cumulative total of **932 693** cases were reported in the Americas. From these, **17 601** are pediatric cases (<15 years old). A total of **513 365** cumulative deaths have been reported since 1986. The figures could be higher since data is incomplete for 1998-1999.

Certain factors such as under diagnosis, underreporting and delayed reporting affect the completeness of the data. This should be considered when analyzing the data. Additionally, many times the countries provide the number of cases by year but do not report the corresponding age, sex and exposure category for those cases.

PAHO and its Member States are working continuously to improve the quality and completeness of the information, to be able to analyze and provide a better profile of the epidemic in each consecutive report.

The Regional Program on AIDS and STD in collaboration with the WHO/PAHO/UNAIDS Working Group on Global HIV/AIDS and STD Surveillance has developed a document—**Epidemiological Fact Sheets on HIV/AIDS and sexually transmitted diseases**—that includes all the relevant epidemiological information about each country. The Epi Fact Sheets can be accessed through our Office or the PAHO's web page (www.paho.org).

Table 1. Number of reported cases of AIDS by year, and cumulative cases and deaths, by country and subregion, as of May 1999.

* Information of 1997 is incomplete due to delayed reporting and includes cases of 1998 when the year of last report is 1998.

(a) Total number of cases and deaths reported by Puerto Rico has not been included in the Latin Caribbean totals.

(b) Total number of cases and deaths of United States of America includes data from Puerto Rico and The Virgin Islands (USA).

(c) The increase of cases in the Latin Caribbean is a consequence of the inclusion of the reported cases for Haiti from the period of 1993-1997 in the 1998 report
